

RETHINK BEHAVIORAL HEALTH

MOBILE APP TRAINING

INSTALLING THE APP

- Visit the **Apple** or **Google Play App Store** and search 'Rethink BH'. Look for the following icon:

| Device Category | OS | Example |
|-----------------|-----------------------|---|
| iPhone | iOS v10 and up | iPhone 6, 6+, 7, 7+, 8, 8+, X, 11, etc. |
| iPad | iOS v10 and up | All: iPad Air, iPad mini, iPad 2, iPad 3, iPad 4, iPad 5, iPad 6, iPad 7 etc. |
| Android Phone | Android v5.0.2 and Up | Samsung, Google, LG, Moto, HTC, etc. |
| Android Tablets | Android v5.0.2 and Up | ASUS, Lenovo, Google, Samsung Galaxy Tablet, etc. |

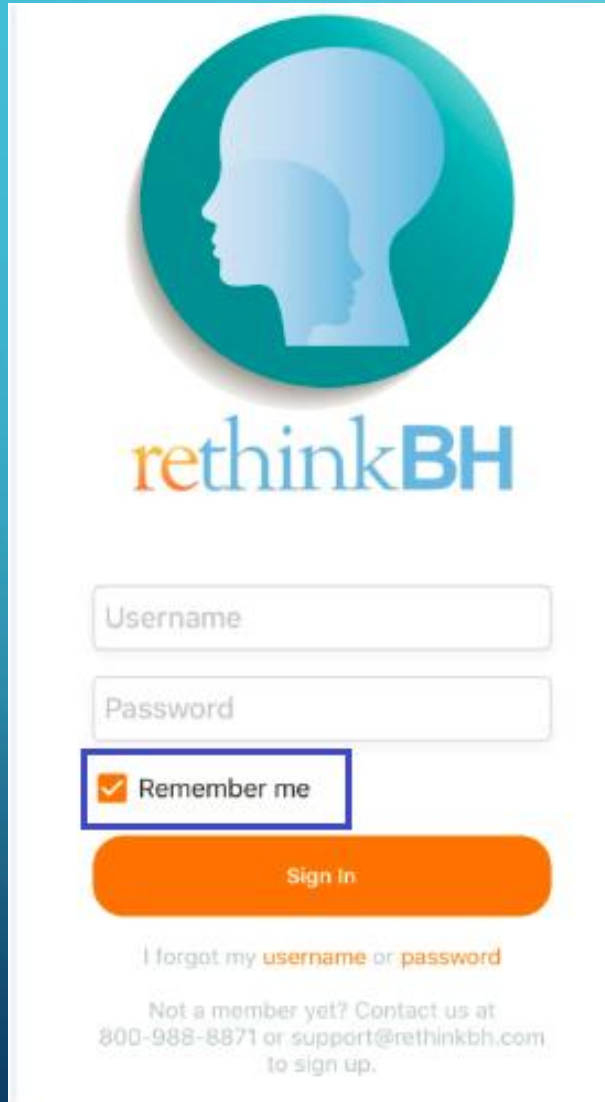

RECOMMENDED OPERATING SYSTEMS FOR IOS AND ANDROID

BEFORE USING THE APP

- Make sure all appointments are added on the website.**
- Make sure individual and group sessions are added.**
- Make sure session note templates have been created and customized to meet funder requirements.**
- Make sure all skill acquisition and behavior reduction programs are set up on the website.**
- For skills, make sure the following fields are set up: goals/objectives, maintenance settings, targets, mastery criteria, data collection type and settings, and the exercise field of the lesson plan.**
- If baseline data has been collected, add this in for skills and behaviors on the website.**
- Switch from baseline to teaching/intervention for all skills and behaviors.**
- For behavior reduction goals, make sure step 1 and step 5 of behavior support are set up.**

LOGGING IN

Log in Screen

The screenshot shows the login interface for rethinkBH. At the top is a circular logo with a teal-to-white gradient, containing a white silhouette of a human head in profile. Below the logo is the text "rethinkBH" in a sans-serif font, with "rethink" in teal and "BH" in blue. The login form consists of three input fields: "Username", "Password", and a "Remember me" checkbox. The "Remember me" checkbox is checked and highlighted with a blue border. Below the input fields is an orange "Sign In" button. At the bottom, there is a link for "I forgot my username or password" and contact information for new members.

Username

Password

Remember me

Sign In

[I forgot my username or password](#)

Not a member yet? Contact us at 800-988-8871 or support@rethinkbh.com to sign up.

Login in from your IOS or Android device with or without internet connection.

To log into the mobile app, use the same username and password that you use to log in to **rethinkbh.com**.

The app now has an additional checkbox on the login screen (Remember Me) which will trigger the use of the saved fingerprint or face ID.

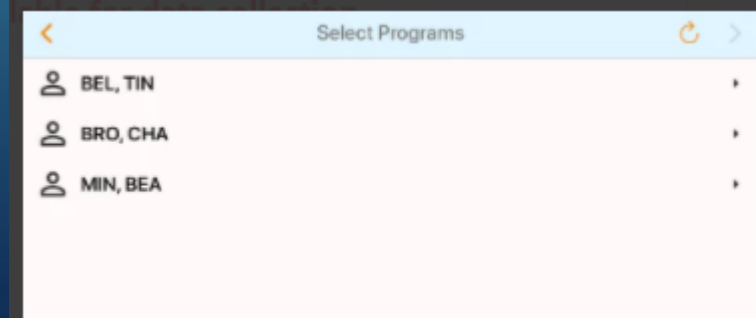

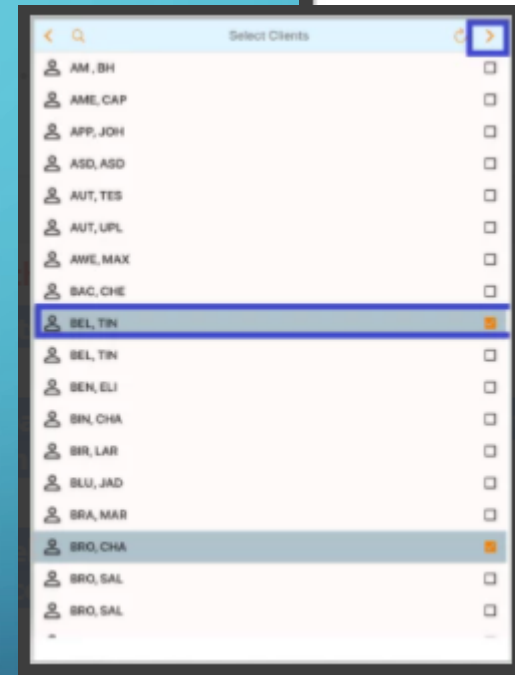

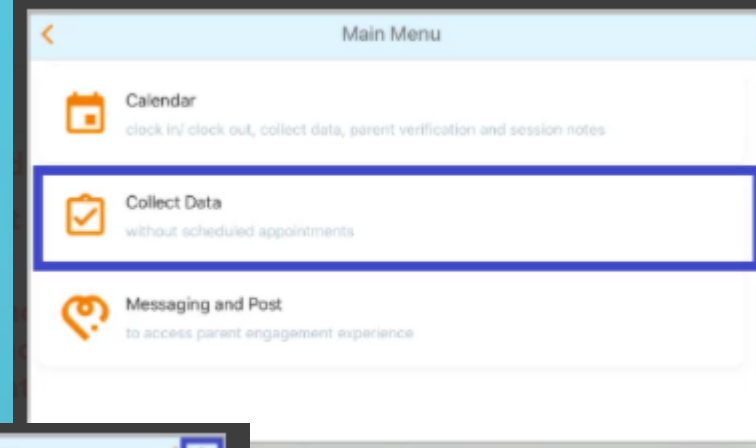

OFFLINE DATA ENTRY

1. Tap Collect Data & Select all clients that you plan on working with offline mode.

2. Go to the next screen, once the loading spinner is done, those clients can be worked in offline mode from anywhere, including the appointments or collect data.

3. Programs do not need to be preselected; all programs will be available when logging in without connection. Programs can be selected at that time.

4. Log out

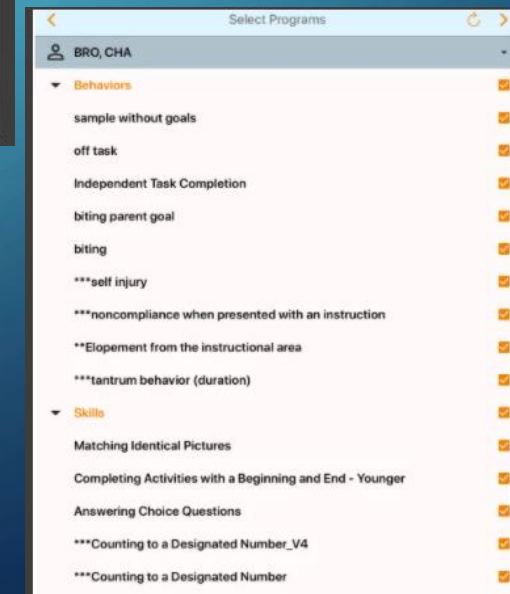

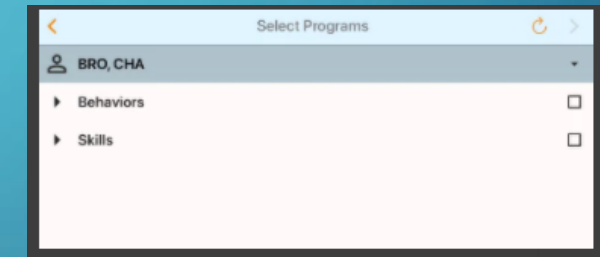

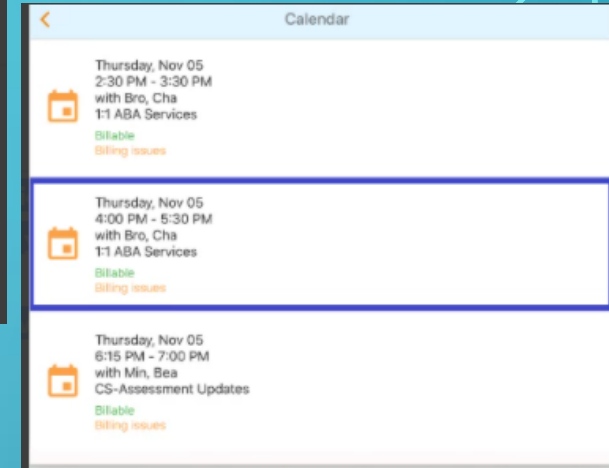

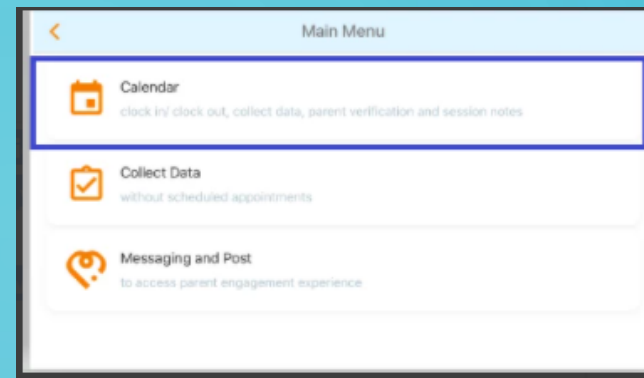

OFFLINE DATA ENTRY

- All appointments are automatically available to view in offline mode once the download is finished (they can see appointments in calendar).
- Offline Mode Tip - When switching to "offline" mode, it's recommended to use airplane mode as that is the easiest way to make sure you don't have an internet connection.
- Data Collection is available for current appointments and appointments in the past (based on time and date). Future appointments are not available for data collection.

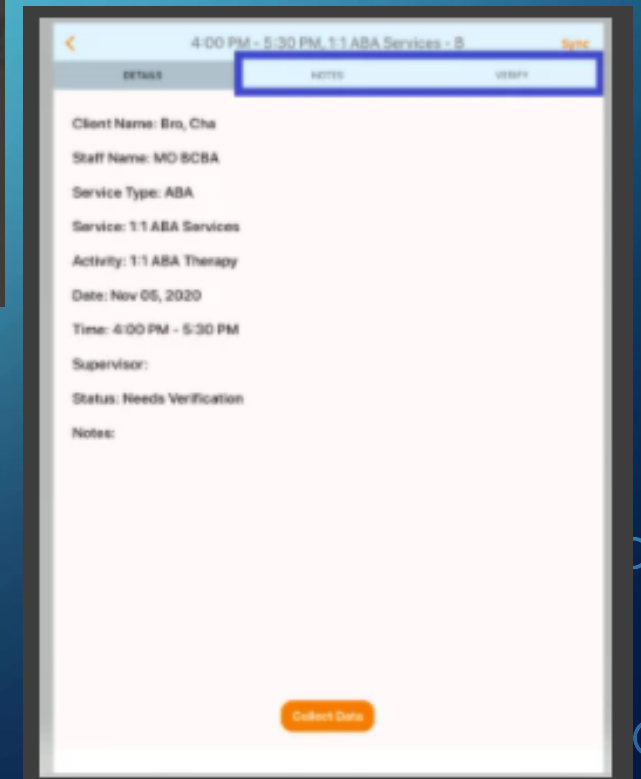

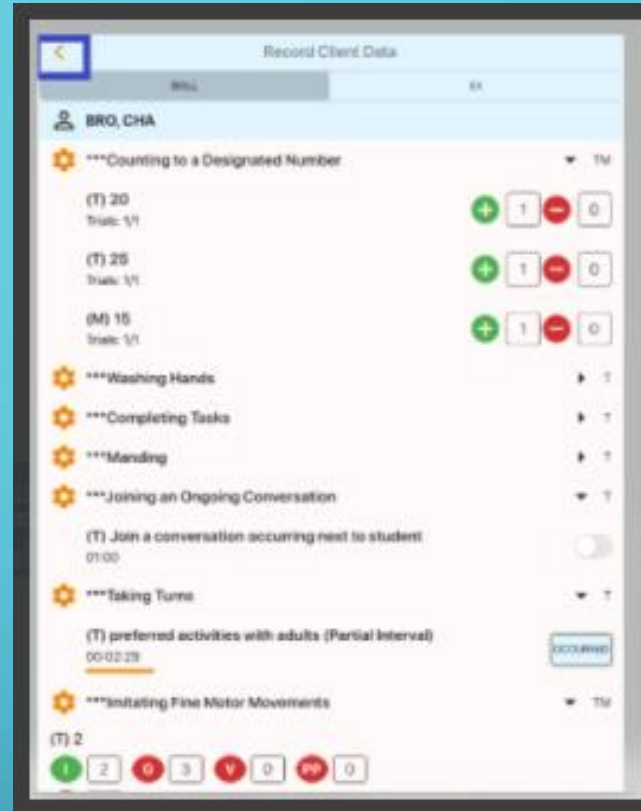

OFFLINE DATA ENTRY

- Offline Mode Data Collection with Appointments
- Tap on Calendar & Select your appointment
- Click on Collect Data
- Select the skills and behaviors needed, and begin data collection in offline mode.

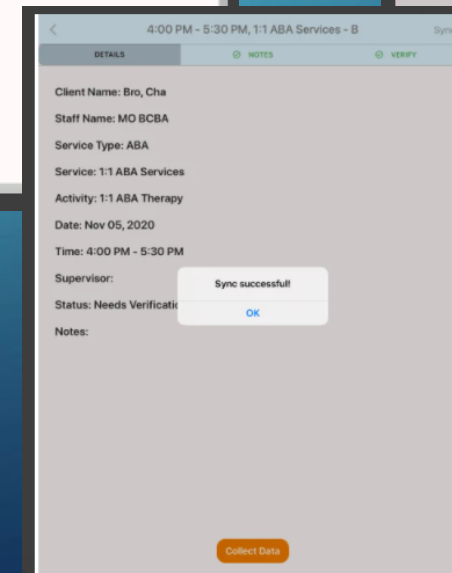

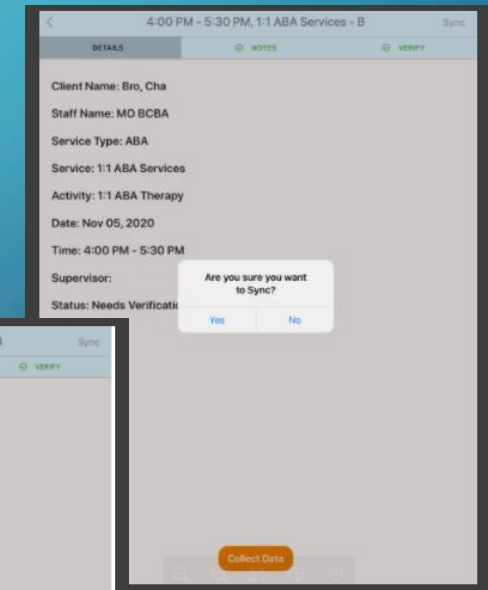

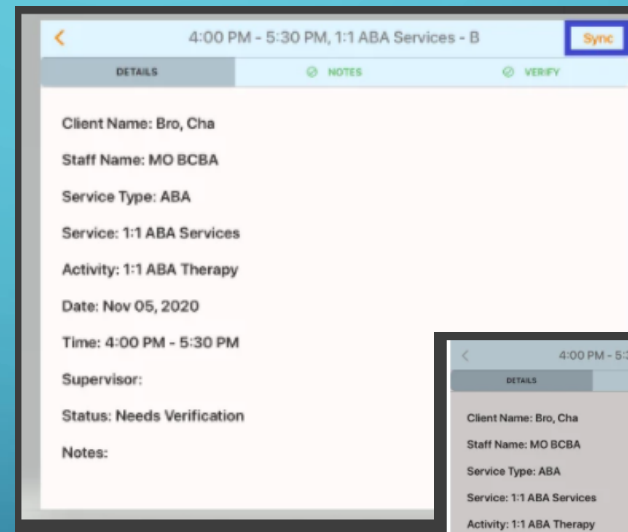

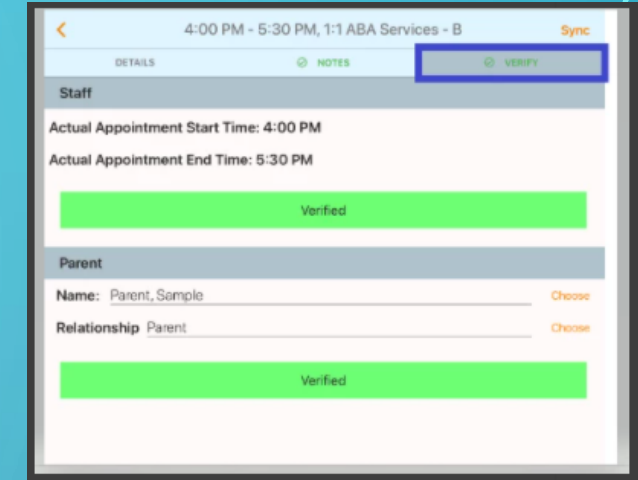

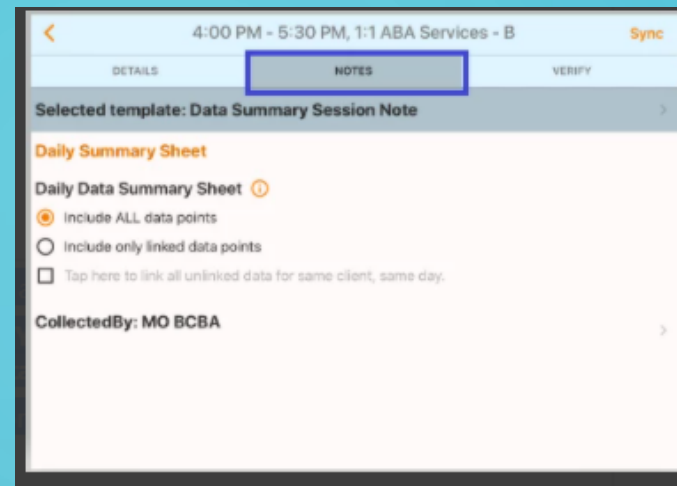

OFFLINE DATA ENTRY

- Enter data without connection for all skills and behaviors needed.
- Go back to the appointment details page to enter your session note and verify your appointment

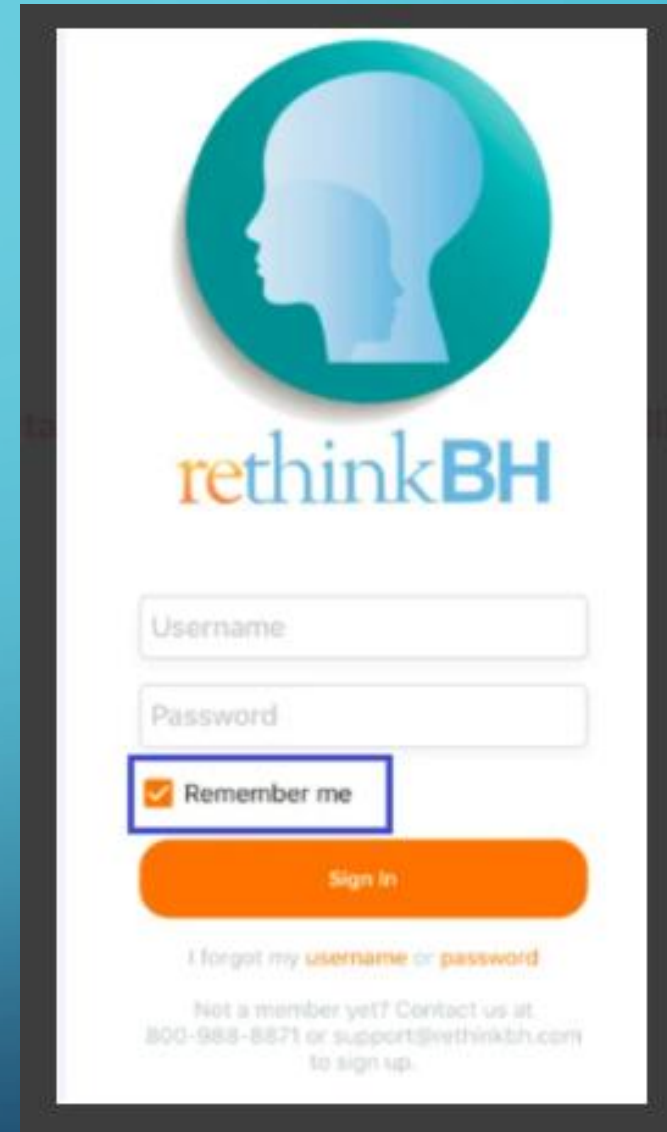

OFFLINE DATA ENTRY

- Complete your session note and verification on the appointment screen.
- To end your session, Press SYNC (in the top right hand corner of the screen 1 time and your data will be saved to your device.)
- Log Out of your device by pressing the back arrow, all data will be saved to your device.

OFFLINE DATA ENTRY

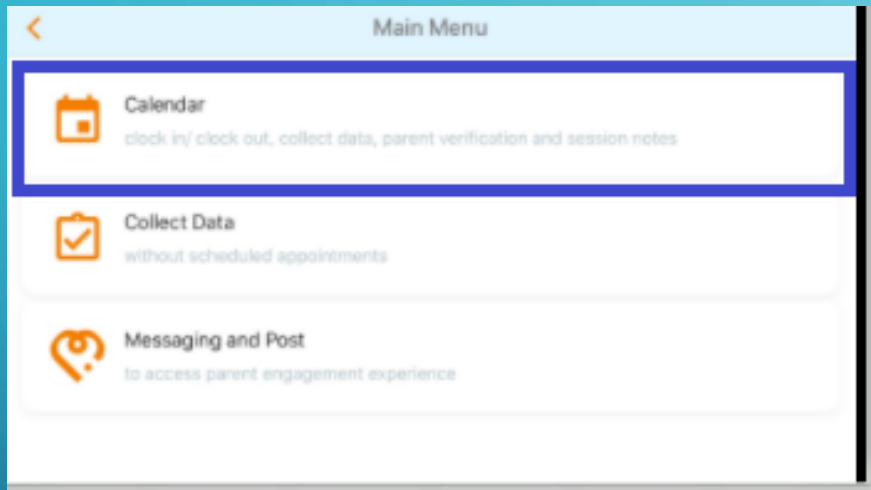

- Log in with connection and your data, session note, and verification will sync to the website.
- Log out.

The screenshot shows the login interface for rethinkBH. At the top is a circular logo featuring a profile of a human head with a brain-like pattern inside, set against a teal-to-blue gradient. Below the logo is the text "rethinkBH" in a sans-serif font, with "rethink" in orange and "BH" in blue. The login form consists of two white input fields with rounded corners: "Username" and "Password". Below these fields is a checkbox labeled "Remember me" which is checked, and this entire checkbox area is highlighted with a blue border. Underneath the checkbox is an orange rounded rectangular button with the text "Sign In" in white. At the bottom of the form, there is a link that says "I forgot my [username](#) or [password](#)". Below the link, there is a line of text: "Not a member yet? Contact us at: 800-988-8871 or support@rethinkbh.com to sign up."

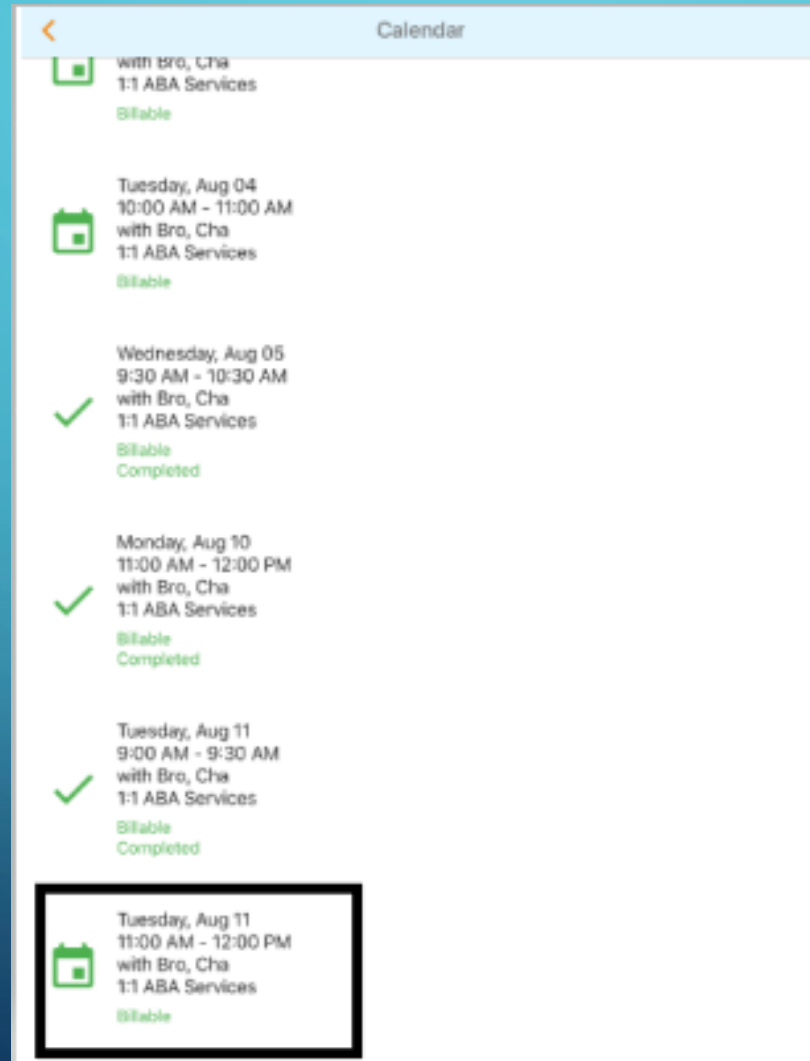

MAIN MENU PAGE ON MOBILE APP

On the main menu page you now have different Clinical and PM options on our mobile app:

- 1. Calendar – allows access to your appointment, take data, enter session notes, and verify appointments. This is the recommended tab for appointments with data entry.**
- 2. Collect Data – allows you to enter data first if you don't have scheduled appointments. Use this tab if you are only entering data, data without an appointment.**
- 3. Messaging and Post – This is the jump point for TheraWe, Rethink's parent engagement tool. Click here to view and post messages to parents and caregivers.**

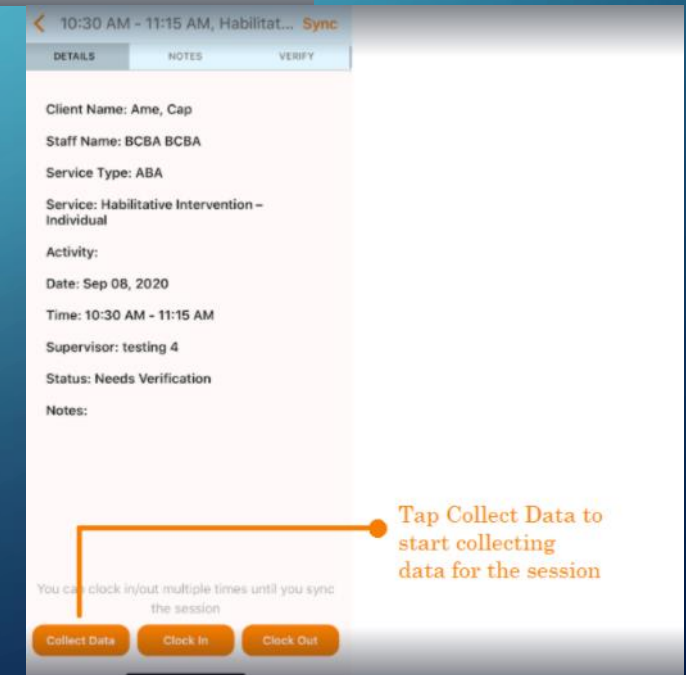

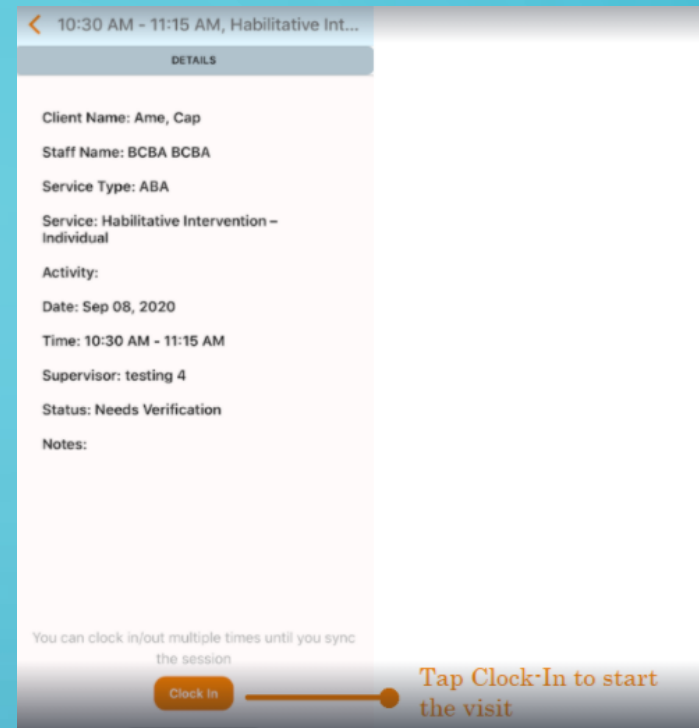

START WITH THE CALENDAR

- When selecting appointments, you can select one appointment for an individual therapy session.
- You can also select multiple appointments for a group therapy session.

EVV AND CLOCKING IN

- If it is a requirement from a funder to clock in and clock out of a session. You will do this after selecting an individual appointment.
- Within the details of the appointment, click on clock in at the bottom of the details to start the visit.

SELECTING APPOINTMENTS FOR A GROUP SESSION

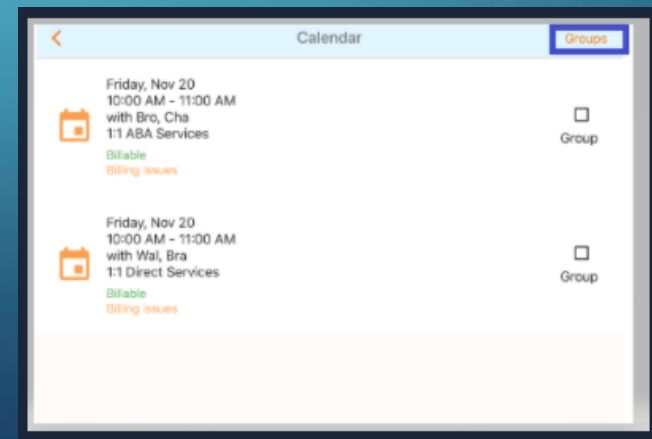

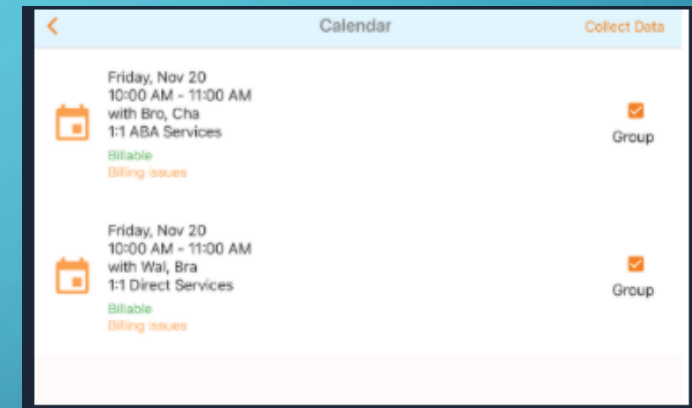

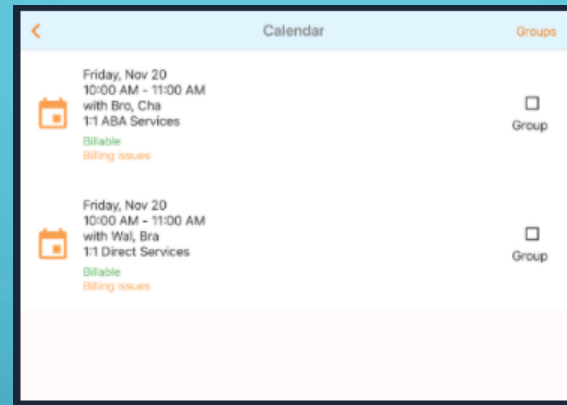

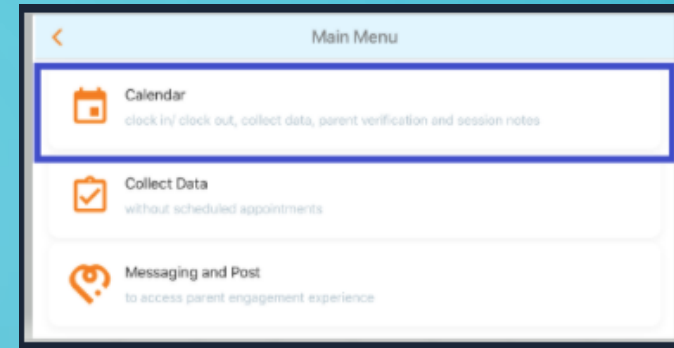

- Go to the Calendar Tab
- You have 2 options for group sessions

OPTION 1:

- Select all appointment for the session, manually check each one.

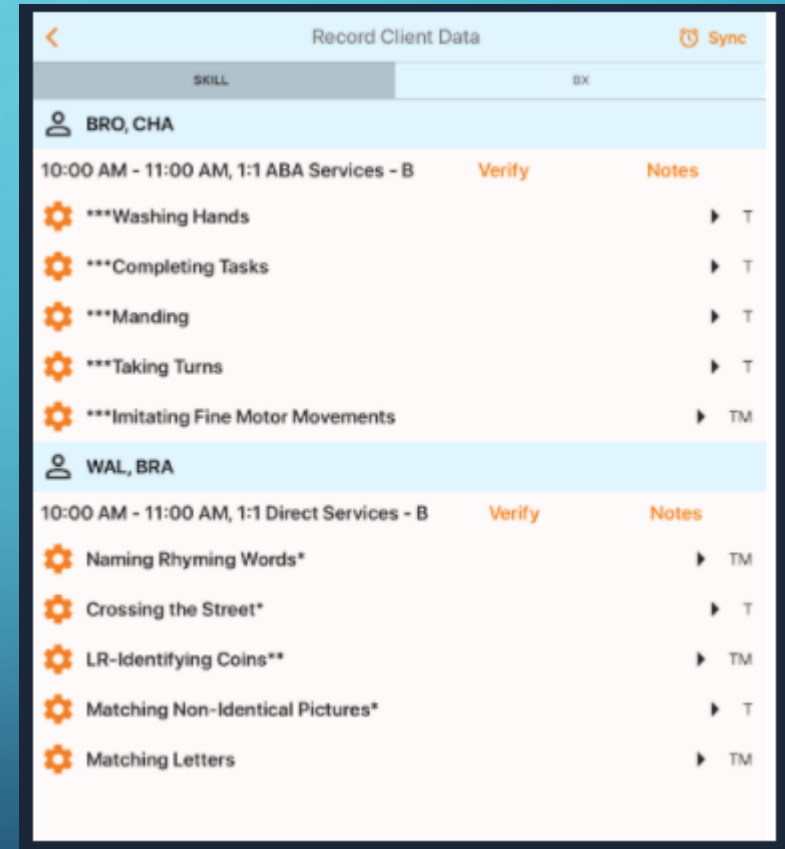

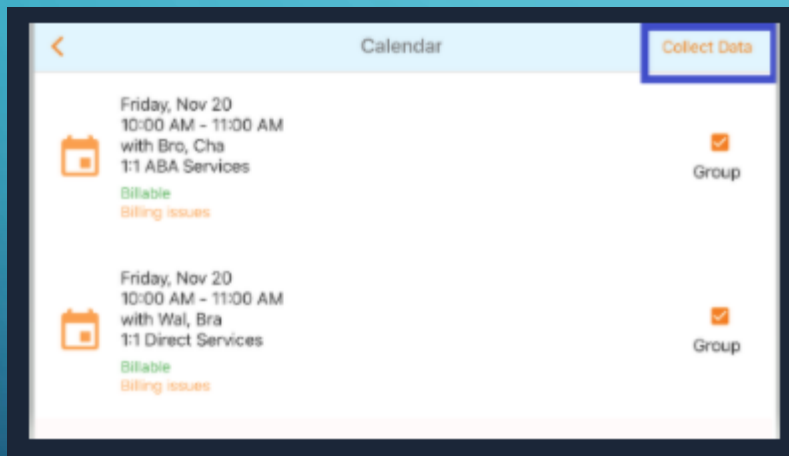

Option 2:

- Click on **GROUPS** in the top right hand corner to view all group appointments (same time and day for different clients)

SELECTING APPOINTMENTS FOR A GROUP SESSION

Click on collect data, select all programs for your group session with each client and tap on the right arrow to begin data collection

Collect Data

COLLECT DATA BUTTON

By clicking on “Collect Data”, this will take you to the list of skill and behavior programs that you need for your session.

SELECT YOUR SKILL AND BEHAVIOR PROGRAMS FOR AN INDIVIDUAL SESSION

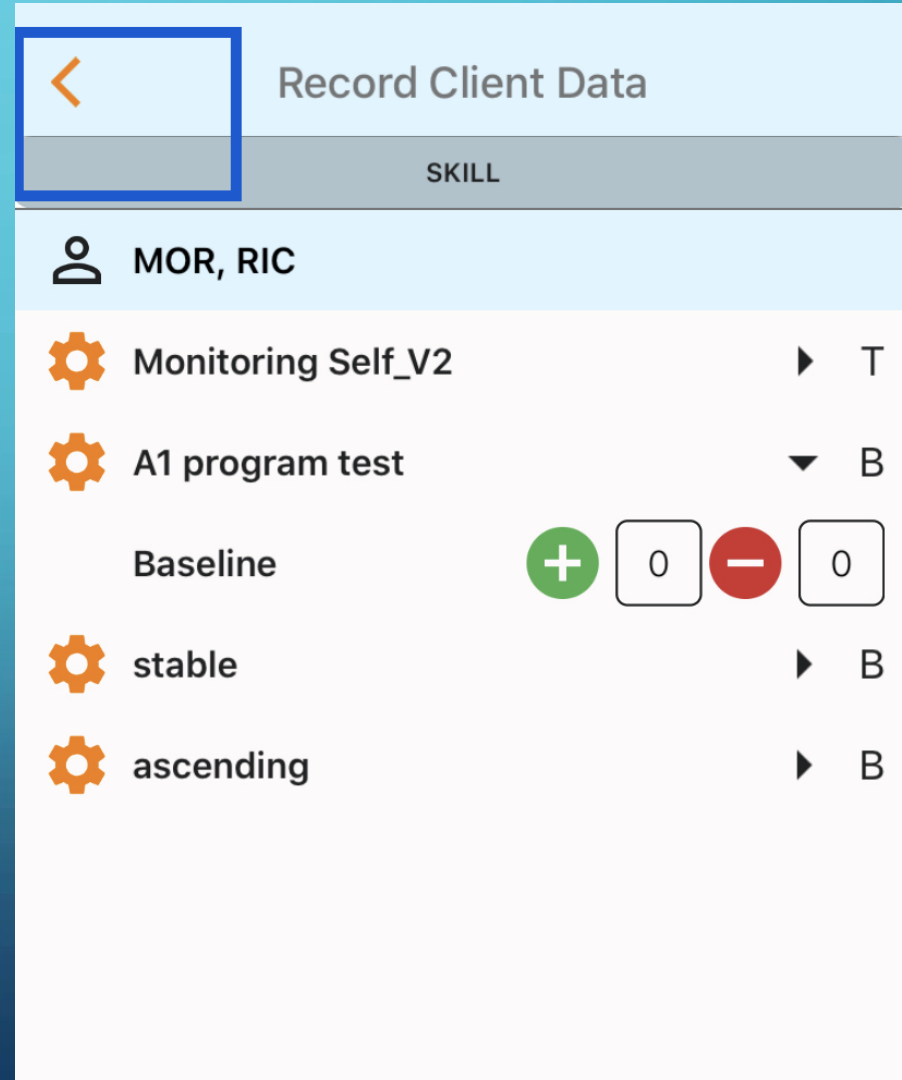

1. Choose the programs you want to work on within the session
2. Click Next (Right arrow on top) to start collecting data
3. If you need to select all skills and behaviors, all that is needed is to check the behavior and skill check box and then press the right arrow to proceed.

The screenshot shows a mobile application interface titled "Select Programs". At the top, there is a navigation bar with a back arrow on the left, the title "Select Programs" in the center, and a refresh icon and a forward arrow on the right. Below the navigation bar, there is a user profile section with a person icon and the text "MOR, RIC" and a dropdown arrow. The main content area is a list of programs, each with a right-pointing triangle icon on the left and a checkbox on the right. The "Skills" section is expanded, showing a list of programs with checkboxes. The "Behaviors" section is collapsed.

| Program | Selected |
|----------------------|-------------------------------------|
| Behaviors | <input type="checkbox"/> |
| Skills | <input type="checkbox"/> |
| Monitoring Self_V2 | <input checked="" type="checkbox"/> |
| A1 test for exercise | <input type="checkbox"/> |
| A1 program test | <input checked="" type="checkbox"/> |
| ascending_V3 | <input type="checkbox"/> |
| backwards | <input type="checkbox"/> |
| stable_V2 | <input type="checkbox"/> |
| stable | <input checked="" type="checkbox"/> |
| ascending | <input checked="" type="checkbox"/> |
| descending | <input type="checkbox"/> |
| Solve Rubik's Cube | <input type="checkbox"/> |

COLLECT DATA AND GO BACK TO THE APPOINTMENT TO SYNC

- Once you finish data collection, you will have to go back to the appointment to complete session note, verify, and sync the data from there.
- Syncing is only done at the appointment screen.

ENTER SESSION NOTE, VERIFY, AND SYNC

- Once you go back to the appointment, you will see the tabs DETAILS, NOTES, AND VERIFY.
- Typically you will fill the session notes within the session as the last step will be to verify the session times and obtain parent's signature.
- Once data has been entered, session notes completed, and verification is completed, you're able to sync your session from any tab in the appointment screen (details, session notes, or verify page)
- Even after you sync the appointment, you can always come back to collect more data points from within the appointment and link them to this appointment.

| Taking Turns | M |
| Brushing Teeth | M |

Lesson Plan Details

By clicking on the gear icon to the left of the skill name, you can then view the setting screen.

On the settings/notes screen you can review: the full lesson plan

The screenshot shows the 'Program Properties' settings screen for 'BIN, CHA'. The screen is divided into 'SETTINGS' and 'NOTES' tabs. The 'SETTINGS' tab is active. The title is 'Using a Variety of Statements to Make Requests'. Under 'Teaching Targets', there are two checked options: 'prompted' and 'spontaneous'. To the right, under 'Probe?', there are two unchecked checkboxes. The 'Goal' section states: 'The student will make requests to engage in actions/activities, or access items by using a variety of statements.' There are three 'Objective' sections, each with a description of the student's performance. The 'Mastery Criteria' section states: 'At Least 25 occurrences per Hour across 10 consecutive Sessions'. The 'Exercise' section includes 'Materials: Preferred items' and a detailed description of the activity: 'Determine which items the student likes by placing varied items on the table and waiting to see which items the student chooses to play with or eat. Set these items aside as the items you will use to teach the lesson. Manipulate a preferred item or activity or pretend to eat a preferred food in front of the student and wait for the student to initiate for the item (e.g., by asking for it, pointing toward it, or reaching for it). When the student uses a statement to request the item (e.g., "Can I have that please?"), give him the item that he requested. Manipulate the item again in front of the student. If the student uses the same statement, ask him to say it differently or wait to see if he will change his response to something else. To help the student respond correctly, model a different statement for the student to request the item (e.g., "Can I have a turn?"). When the student uses a different statement to request, provide the item and offer praise (e.g., "I like that way you asked for a turn!"). Continue to entice the student by manipulating or consuming preferred items in front of the student. If the student says the last statement, prompt a different statement by modeling something else to say. Provide more/better rewards when

The screenshot shows the 'Program Properties' notes screen for 'BIN, CHA'. The screen is divided into 'SETTINGS' and 'NOTES' tabs. The 'NOTES' tab is active. The title is 'BIN, CHA'. The notes section contains several paragraphs of text. The first paragraph describes the goal: 'entice the student by manipulating or consuming preferred items in front of the student. If the student says the last statement, prompt a different statement by modeling something else to say. Provide more/better rewards when the student responds correctly without a model. Error Correction: Provide a verbal model of a different statement'. The 'Generalization' section states: 'Have a different person withhold a preferred item/activity/action to see if the student uses a variety of requests. Bring the student to different places (e.g., candy store) and have him request items or activities using a variety of statements.' The 'Error Correction' section states: 'Provide a verbal model of a different statement'. The 'Supplies' section lists 'Preferred items'. The 'Teaching Strategies' section is empty. The 'Troubleshooting' section states: 'Problem: The student seems to be having trouble thinking of statements to use. Solution: During initial teaching, try writing different statements down on a piece of paper. Present different requests in succession, so that he is rotating through different request statements.' The 'Helpful Hints' section states: 'Model different statements when you request things from the student. Make sure the student is motivated for this lesson. If he is not interested in the activity or item, choose new items or take a brief break from the lesson and run it at a later time.' The 'Lesson Updates' section lists: 'Note: updates here', 'Author: BCBA BCBA', 'Date: 01-28-2019', 'Note: add note', 'Author: Behavior Technician', and 'Date: 01-10-2019'.

The full lesson plan includes: Goal, Objectives, Targets, Mastery Criteria, Maintenance Mastery Criteria, Exercise, Generalization, Error Correction, Supplies, Teaching Strategies, Troubleshooting, Helpful Hints, & Lesson Updates

DESELECTING AND SELECTING TARGETS

- By default all teaching and maintenance targets added on the website will be checked off on the mobile app
- When you're getting starting it's important to deselect and/or select teaching and maintenance targets needed for data collection
- After you select the targets needed, press SAVE

The screenshot shows the 'Program Properties' screen in a mobile application. At the top, there is a back arrow, the title 'Program Properties', and a 'Save' button. Below the title bar are three tabs: 'SETTINGS' (selected), 'DATA', and 'NOTES'. The main content area is titled 'BRO, CHA' and contains the following sections:

- Matching Categories**
- Teaching Targets:**
 - Animals
 - Vehicles
 - Furniture
- Maintenance Targets:**
 - Food
 - Clothing
 - Toys
- Probe?** (Two columns of checkboxes, one for each target list):
 - Column 1: (under Animals), (under Vehicles), (under Furniture)
 - Column 2: (under Food), (under Clothing), (under Toys)
- Goal:**

The student will match by placing a variety of pictures/items with their corresponding category within a larger set.
- Mastery Criteria:**

5 trials, 80% over 3 consecutive sessions

VIEWING PREVIOUS SKILLS DATA ON MOBILE APP

HOW TO ADD SKILL/TARGET NOTES

To enter notes on a target:

- Tap on the gear icon, tap on notes tab to add notes for each teaching or maintenance target with data entered.
- Select your target, Type your notes in the Notes field and tap on the save icon in the top right hand corner.

The screenshot shows the 'Program Properties' interface with the 'NOTES' tab selected. The target is 'BRO, CHA'. The lesson is '***Counting to a Designated Number'. The target field contains two rows of data: 15 and 10. The note field is empty.

| Target | Value |
|--------|-------|
| 15 | |
| 10 | |

Note: Additional comments...

NAVIGATING THE BEHAVIOR PAGE

- When you click on the BX tab at the top, you can view challenging behaviors that you've selected for data collection.
- By clicking on the gear icon, you can view:
 - Full Behavior Plan
 - Previous Data Entered & Graphs
 - Add notes for behaviors
- By clicking the ABC icon in the right-hand corner, ABC data collection can be entered for all behaviors.

The screenshot displays the 'Record Client Data' interface. At the top, there is a navigation bar with a back arrow and the title 'Record Client Data'. Below this, there are two tabs: 'SKILL' and 'BX', with 'BX' being the active tab. The main content area shows a client profile for 'BRO, CHA' with an 'ABC' icon in the top right corner. Below the profile, there is a list of behaviors with their respective tracking options:

- ***self injury (Partial Interval)**: Includes a gear icon, a timer showing '00:14:01' with an orange progress bar, and an 'OCCURRED' button.
- ***noncompliance when presented with an instruction**: Includes a gear icon, a green '+' button, a counter box with '0', a red '-' button, and another counter box with '0'.
- **Elopement from the instructional area**: Includes a gear icon, a green '+' button, and a counter box with '0'.
- ***tantrum behavior (duration)**: Includes a gear icon, a timer showing '00:00', and a toggle switch.

BEHAVIOR PLAN DETAILS

- On the Behavior Settings Screen, you can view behavior plan details for each behavior.
- Behavior Plan details include the following:
- Behavior, Definition, Goal, Objectives, Plan Name, Plan Start/End Date, Review Dates, Assessments Completed, Assessment Start/End Dates, Assessment Notes, Function(s) of Behaviors, Antecedent Strategies, Replacement Skills, Adaptive Skills, Other Proactive Strategies, Consequence Strategies for Problem Behavior and Appropriate Behaviors

HOW TO ADD BEHAVIOR NOTES

To enter notes on a behavior:

Tap on the gear icon, tap on notes tab to add notes for a behavior with data entered.

Type your notes in the Notes field and tap on the save icon in the top right hand corner.

The screenshot displays the 'Program Properties' interface. At the top, there is a back arrow, the title 'Program Properties', and a 'Save' button. Below the title bar is a navigation menu with three tabs: 'SETTINGS' (with a gear icon), 'DATA' (with a list icon), and 'NOTES' (with a calendar icon). The 'NOTES' tab is currently selected. The main content area shows the behavior name 'BRO, CHA' with a small icon to its right. Below this, the text 'Lesson: **Elopement from the instructional area' is displayed. Underneath, there is a 'Note:' label followed by a large, empty text input field. At the bottom of the input field, the placeholder text 'Additional comments...' is visible.

OPPORTUNITY BASED DATA (WITHOUT PROMPTS)

For opportunity-based program, you will see a '+' and '-' button next to each target that is selected.

Tap '+' each time the client provides a correct response and tap '-' each time the client provides an incorrect response.

Opportunity Based without Prompts

The screenshot shows a white rectangular interface on a blue background. At the top left is an orange gear icon. To its right is the text '***Counting to a Designated Number'. At the top right is a dropdown arrow and the text 'TM'. Below the title, on the left, is '(T) 15' and 'Trials: 0/1'. On the right side, there are four buttons: a green circle with a white plus sign, a white square with a black border containing the number '0', a red circle with a white minus sign, and another white square with a black border containing the number '0'.

EDITING OPPORTUNITY BASED DATA (WITHOUT PROMPTS)

To edit data already entered:

Tap on text boxes that need editing, make changes with number pad. When finished editing, click on DONE on the number pad. Continue to collect data.

The screenshot shows a mobile application interface titled "Record Client Data". At the top, there are two tabs: "SKILL" (selected) and "BX". Below the tabs, there is a user profile section with a person icon and the text "BRO, CHA". A gear icon indicates settings, with the text "***Counting to a Designated Number" and a dropdown menu showing "TM". Below this, there are two rows of data: "(T) 15" with "Trials: 1/1" and "(M) 10" with "Trials: 0/1". Each row has a green "+" button, a number box (5 for T, 0 for M), a red "-" button, and another number box (1 for T, 0 for M). At the bottom right of the form area, there is a blue "Done" button. Below the form is a standard mobile keyboard with a numeric keypad at the top, a QWERTY keyboard, and function keys like "undo" and "ABC".

OPPORTUNITY BASED WITH PROMPTS DATA

Below each target, you will see a set of buttons with a 1-2 letter code. Each button represents a different prompt code and level that had been previously set up for that lesson. For each response, the client provides, tap the button associated with the prompt that was given to help the client respond correctly.

The number of each prompt or independent responses are in the text boxes to the right of each response. The prompts used are listed below under trials.

EDITING OPPORTUNITY BASED PROMPT DATA

Editing Opportunity Based with Prompts

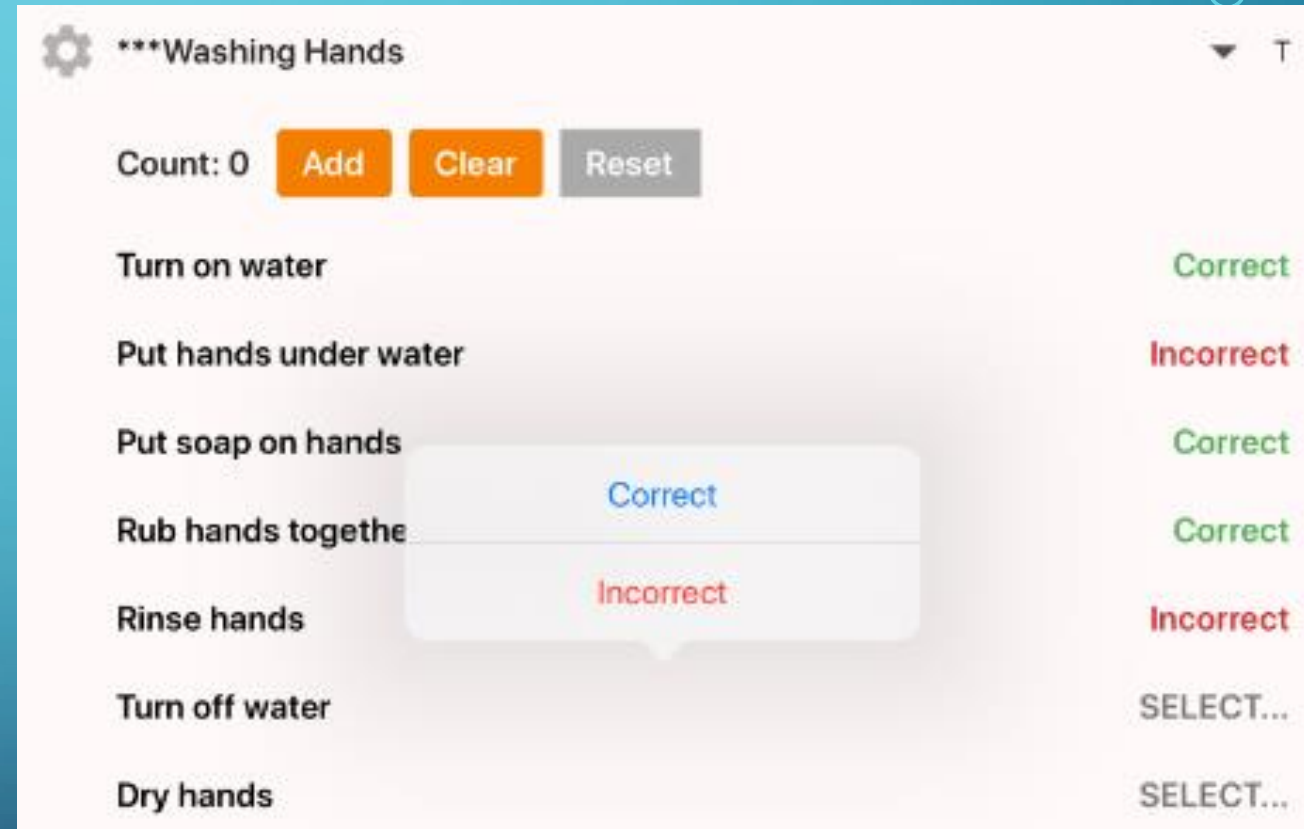

To edit opportunity-based data with prompts:

Tap on text box next to response, the number pad appears, make corrections, and press done.

TASK ANALYSIS WITHOUT PROMPTS

- Tap on the title of the program – this allows a TA program to expand
- Then there will be a select button next to each step of the TA for data collection
- Tap on the SELECT button and a pop-up will appear with two options (correct and incorrect). After the client has attempted a step, choose correct if they were successful and incorrect if they were not successful.
- Please note that a selection must be made for each teaching step that is available in order to save the data.

MULTIPLE OPPORTUNITIES FOR TASK ANALYSIS WITHOUT PROMPTS

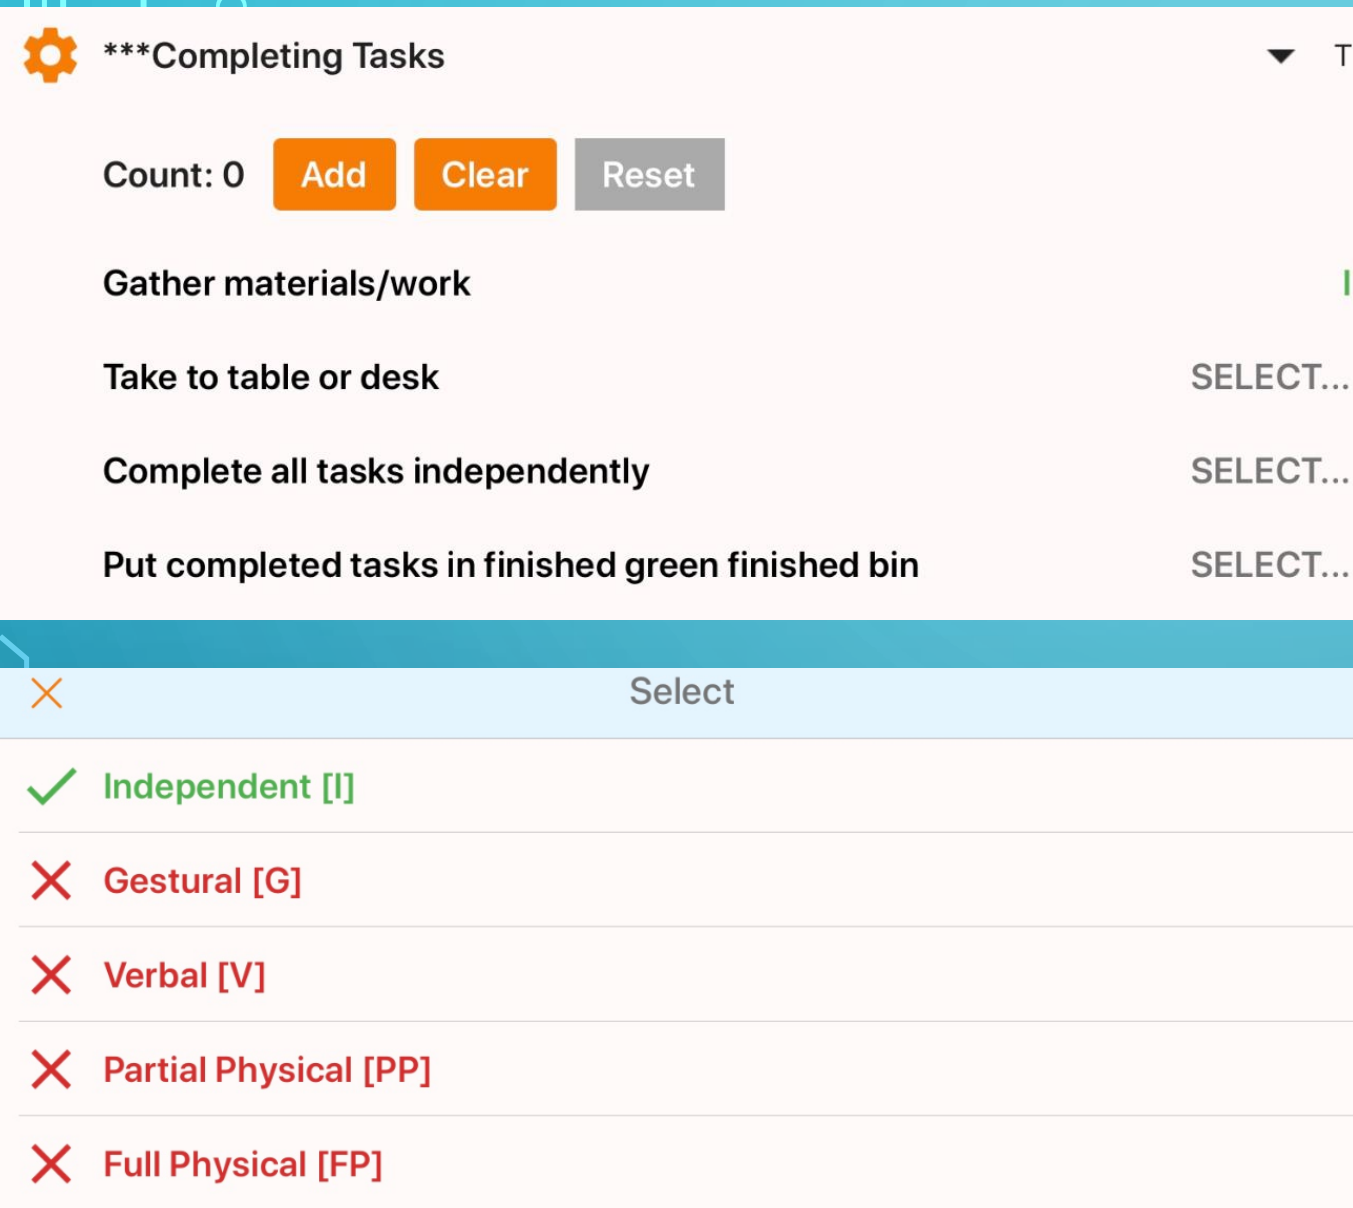

The screenshot shows a task analysis interface titled '***Washing Hands'. At the top left is a gear icon. Below the title, there is a control bar with 'Count: 1', an 'Add' button, a 'Clear' button, and a 'Reset' button. A list of seven tasks follows, each with a 'Correct' status indicator on the right:

| Task | Status |
|-----------------------------------|---------|
| Turn on water | Correct |
| Put hands under water | Correct |
| Put soap on hands | Correct |
| Rub hands together to lather soap | Correct |
| Rinse hands | Correct |
| Turn off water | Correct |
| Dry hands | Correct |

To enter multiple opportunities for task analysis without prompts, follow these steps:

- 1-Enter data on all steps of the TA
- 2-You'll notice the Count is 1
- 3-Press the Add button to enter a second opportunity for the TA
- 4-Add as many opportunities as needed for the session
- 5-Once you sync the data all opportunities will be saved and calculated as an average
- 6-The Clear button clears all steps of the current TA opportunity
- 7-The Reset button takes you back to the previous opportunity

- Tap on the title of the program – this allows a TA program to expand
- Then there will be a select button next to each step of the TA for data collection
- Tap on the **SELECT** button and a new screen will appear with prompting options that have been set up on the website for this program. After the client has attempted a step, choose the prompt level provided.
- Color coding of green and red are provided for correct and incorrect prompts.
- Please note that a selection must be made for each teaching step that is available in order to save the data.

MULTIPLE OPPORTUNITIES FOR TASK ANALYSIS WITH PROMPTS

To enter multiple opportunities for task analysis with prompts, follow these steps:

The screenshot shows a software interface for task analysis. At the top left is a gear icon and the text '***Completing Tasks'. Below this is a control panel with a 'Count: 1' label and three orange buttons: 'Add', 'Clear', and 'Reset'. The 'Add' button is highlighted with a black border. Below the control panel is a list of four tasks, each with a 'SELECT...' dropdown menu to its right:

- Gather materials/work
- Take to table or desk
- Complete all tasks independently
- Put completed tasks in finished green finished bin

1-Enter data on all steps of the TA

2-You'll notice the Count is 1

3-Press the Add button to enter a second opportunity for the TA

4-Add as many opportunities as needed for the session

5-Once you sync the data all opportunities will be saved and calculated as an average

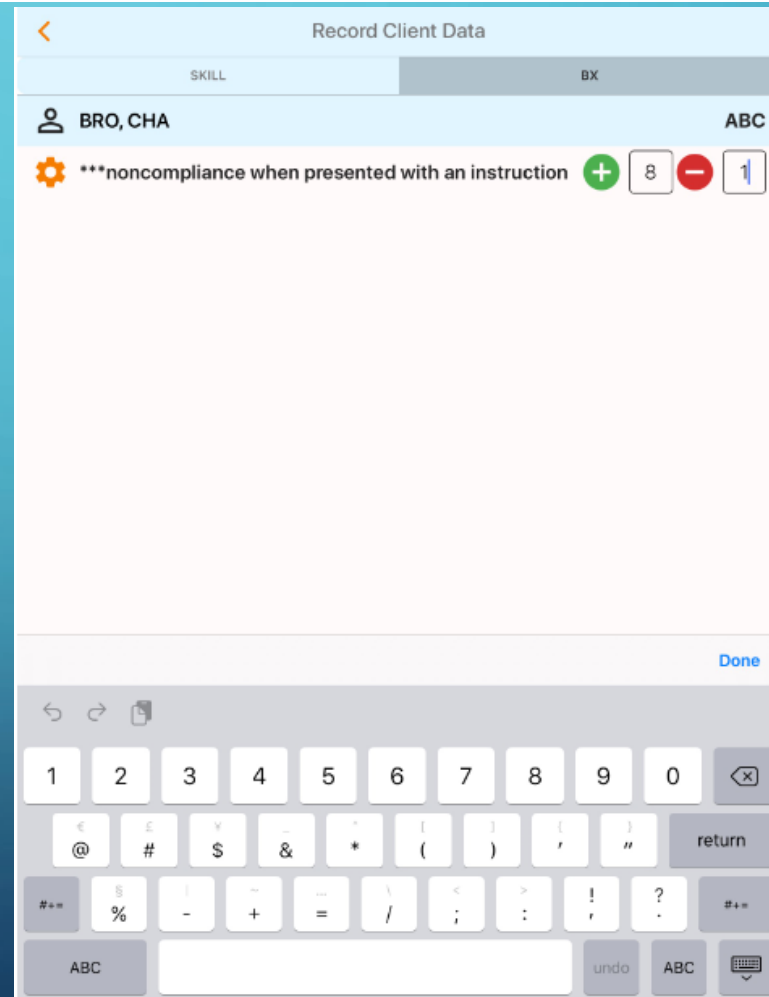

6-The Clear button clears all steps of the current TA opportunity

7-The Reset button takes you back to the previous opportunity

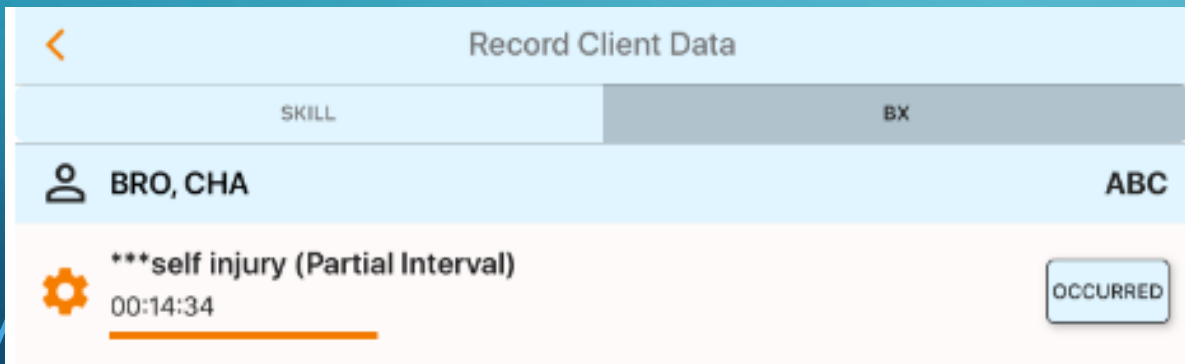

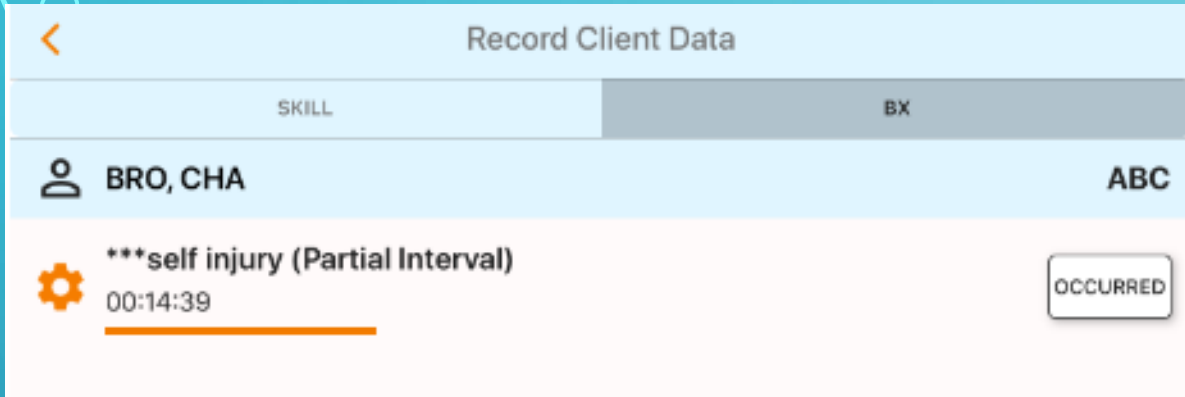

OPPORTUNITY BASED FOR BEHAVIORS

- To collect opportunity based or % of opportunities for behaviors:
- During opportunities, tap the + button for each time the behavior occurred and the – button each time the behavior did not occur.
- To edit opportunity based data for behaviors:
- Tap on the text box and edit any opportunities/make any corrections before syncing data.

 ***noncompliance when presented with an instruction  8  1

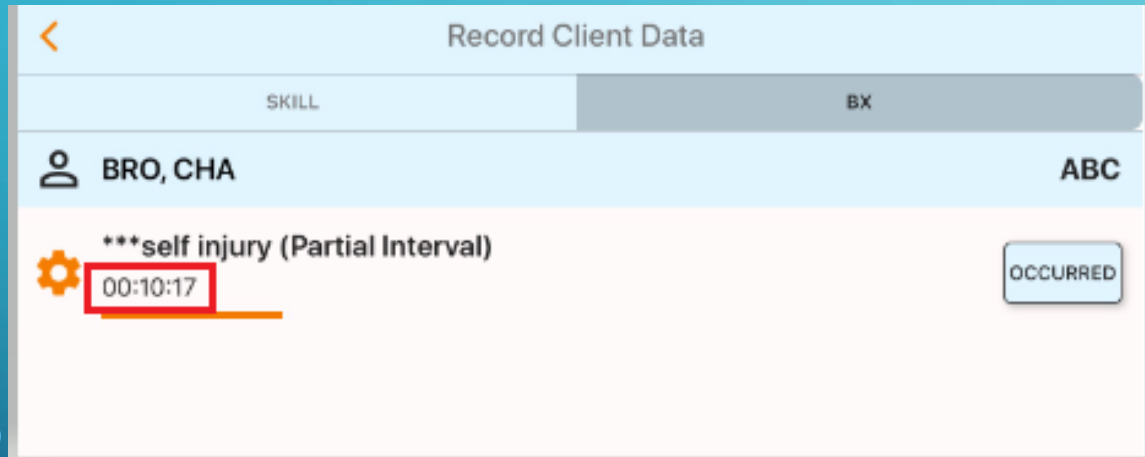

PARTIAL INTERVAL DATA

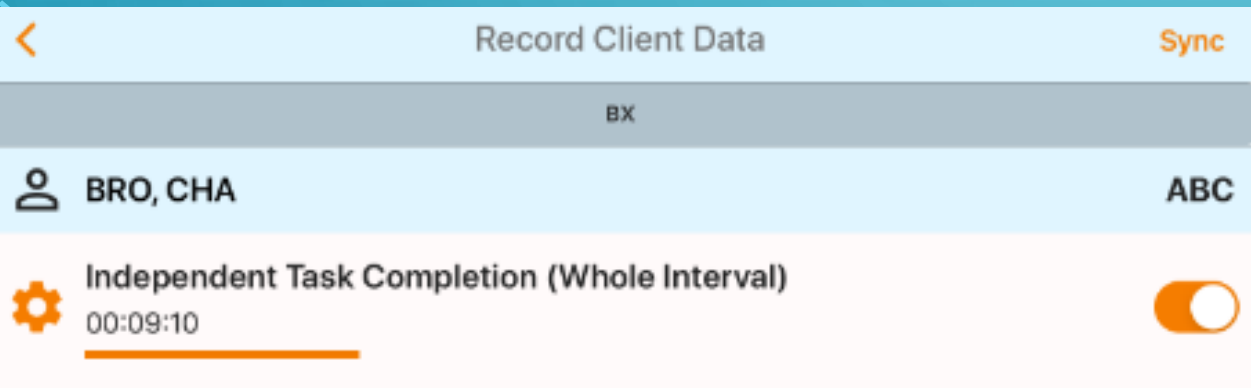

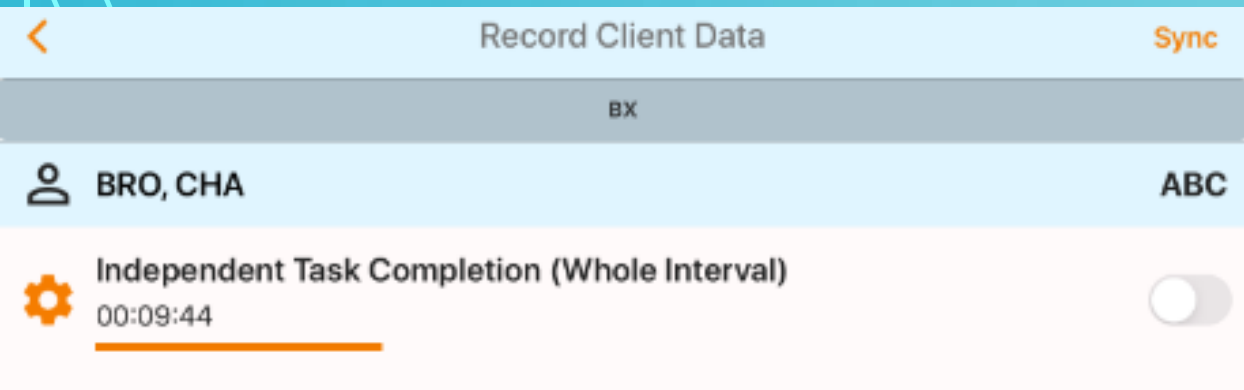

- For targets and behaviors set up to record partial interval data, you will see a white 'Occurred' button on the right and a timer on the left. When you start the data session, the timer will count down immediately and show you how much time is remaining for the current interval.
- When the behavior occurs, tap on the Occurred button. The button will turn dark blue.
- The occurred button can only be pressed 1 time during an interval.

PARTIAL INTERVAL DATA

- The timer that is under the target behavior name will continue to count down for each interval.
- Once the timer reaches zero, it will reset and the 'Occurred' button will turn white and you will be able to tap on it again to record the next occurrence of the behavior.
- If the behavior did not occur during an interval, it will automatically be recorded as a non-occurrence for that interval. Users do not have to mark a no or non-occurrence for that interval.

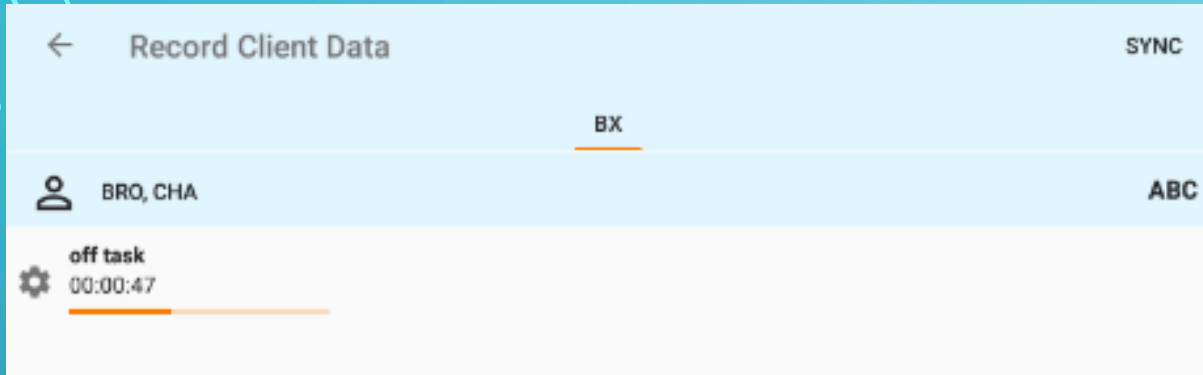

WHOLE INTERVAL DATA

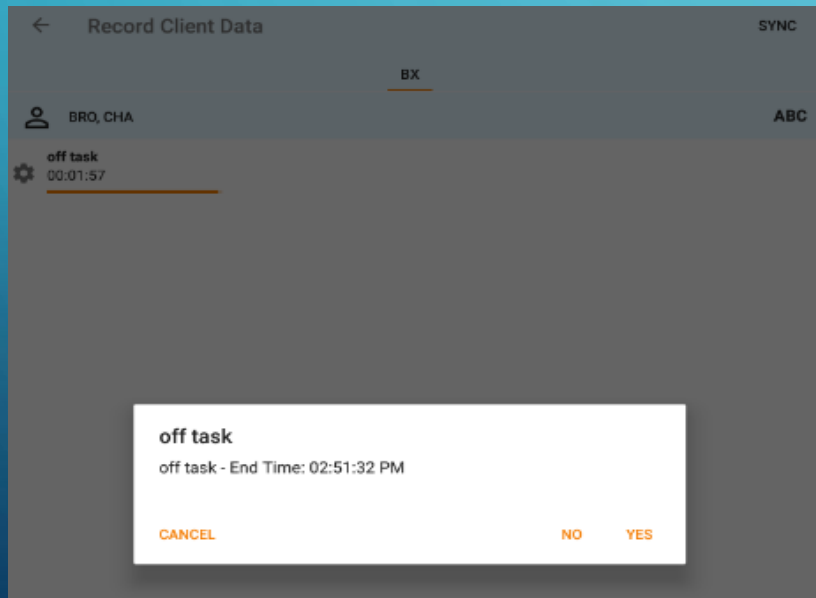

- For targets or behaviors that are set up as whole interval, you will see a gray button used to toggle the timer.
- In addition, there is an orange bar underneath the timer showing how much time there is left in the interval.
- When you start the session, the counter will be turned off. When the behavior begins, press the button to start the timer. When the behavior ends, press the button to stop the timer. Repeat this throughout the session. Rethink will then compare the times that the behavior was occurring with the start and end times of each interval and calculate the percentage of intervals that the behavior was occurring throughout.

MOMENTARY TIME SAMPLE ANDROID DEVICES

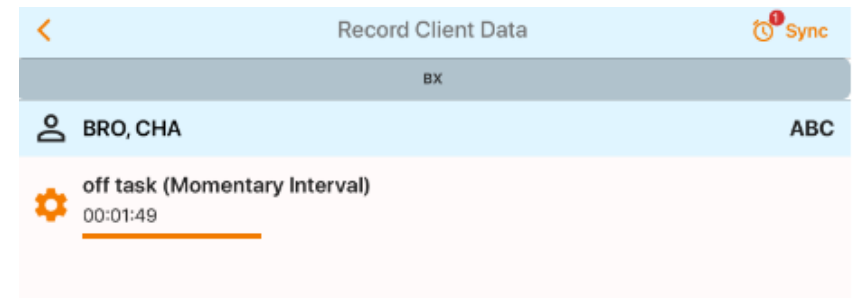

For targets or behaviors using momentary time sample, you will see a counter with a orange bar underneath it.

The counter shows how much time is remaining in the current interval, and it is counting down.

Once the counter reaches zero, you will see a pop-up asking if the behavior is occurring at that moment. Your options are yes – it is occurring, no – it's not occurring, or cancel If no data is needed for that specific interval.

MOMENTARY TIME SAMPLE IOS DEVICES

INTERVAL DATA COLLECTION TIPS

If you don't need to enter interval data right away, you can use the back arrow to select your skill/behavior program when needed and enter interval data.

If you only need to enter interval data for a short period of time, you can select the skill/behavior, enter data, and use the back arrow to deselect the skill/behavior once you're finished entering in data. The data will be saved and will sync when you sync the rest of your data session.

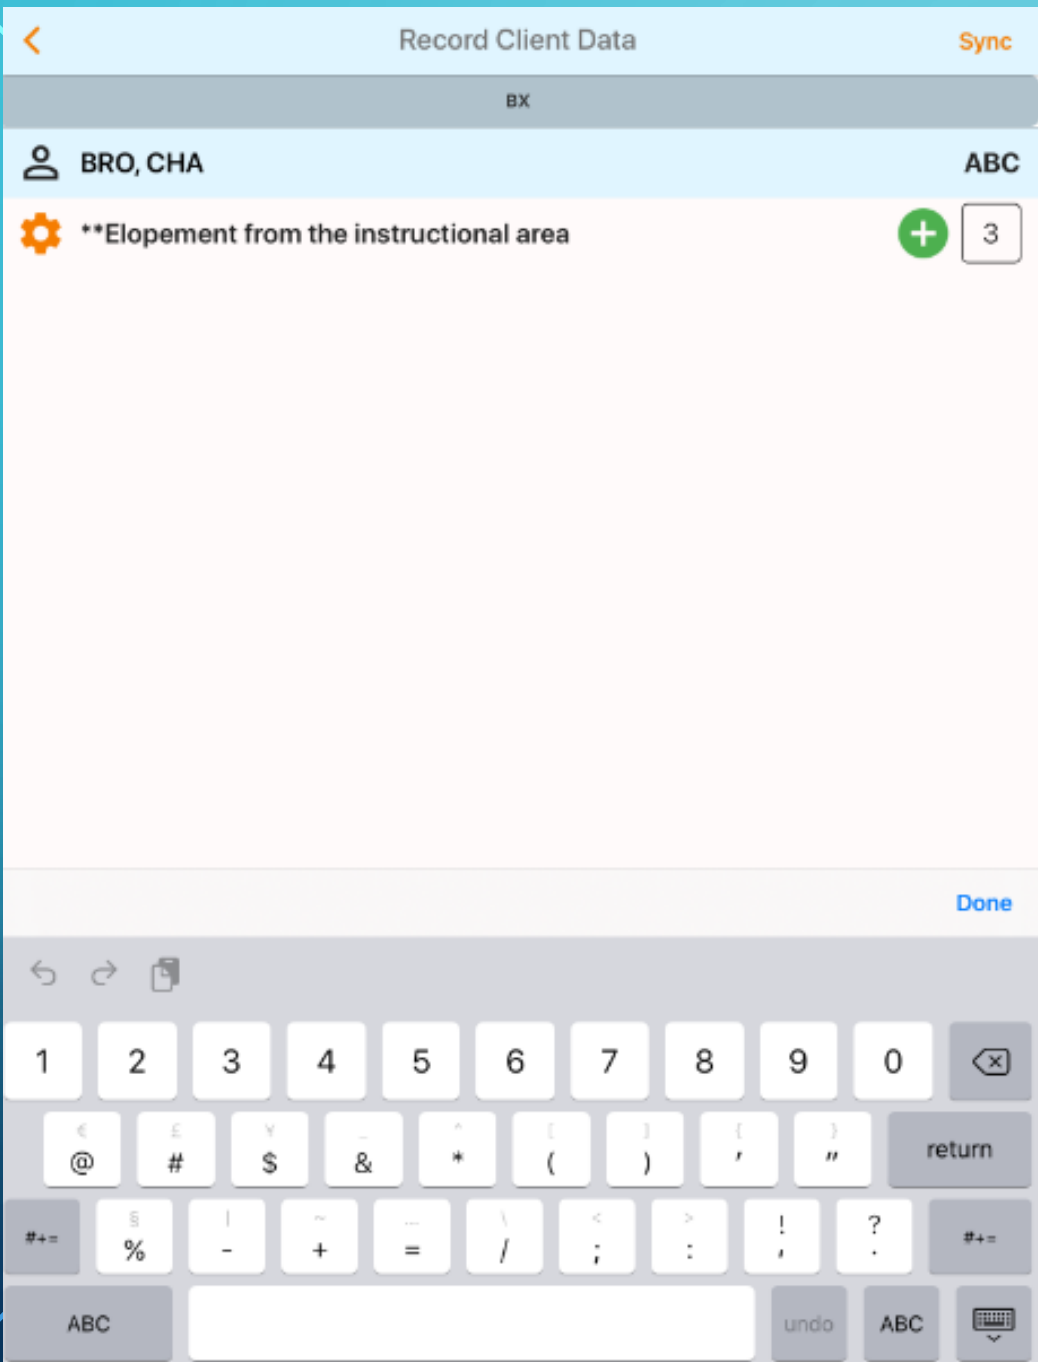

If you need to collect interval data during the whole session, select the skill/behavior in the beginning and the interval will run the length of the whole session until you sync your data.

FREQUENCY DATA

- To record frequency data on a behavior or a skill, you will see a “+” button to record each occurrence.
- Tap the “+” button each time the behavior or skill occurs.
- When you sync your data the total frequency occurrence will be recorded and graphed.

EDITING FREQUENCY DATA

- **Made a mistake? Tap Edit on the behavior needing edits → Tap the box → Manually enter new value with the number pad. Save changes to all data.**

ENTERING ZERO FOR FREQUENCY OR DURATION DATA COLLECTION

- For skill and behaviors, if zero occurrences occurred during a session follow these steps to have your data graphed as zero:
 1. Select behaviors/skills needed for the session.
 2. For frequency, do not enter any occurrences.
 3. For duration, do not enter any occurrences.
 4. Sync your data at the end of the session without any data entered for skills/behaviors with zero occurrences.
 5. Data will be graphed as zero times/minutes for both frequency and duration.

ENTERING MAINTENANCE DATA

- Select the skill needed for maintenance data collection
- Click on the gear icon to deselect/select the targets needed for the session, save changes
- Expand the goal on the data entry screen to see maintenance targets
- Enter maintenance data and any notes on targets
- At the end of the session, baseline, teaching, and maintenance data can be synced.

ENTER SESSION NOTES

- After you have finished collecting data, hit the left back arrow to complete your session note.
- Click on the NOTES tab and select the template needed.
- Be sure to complete all required fields and signatures.

VERIFY YOUR APPOINTMENT ON THE APP

- After completing your session note, verify your appointment and complete the Parent Verification (if required by your company)
- Click on the VERIFY tab to verify the start and end times.
- Completed the parent verification with a signature if required.

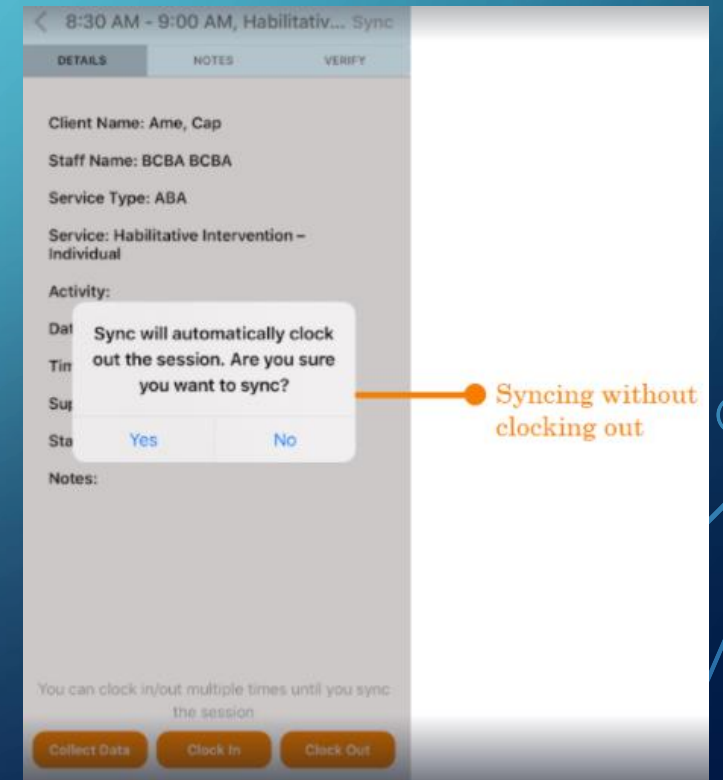

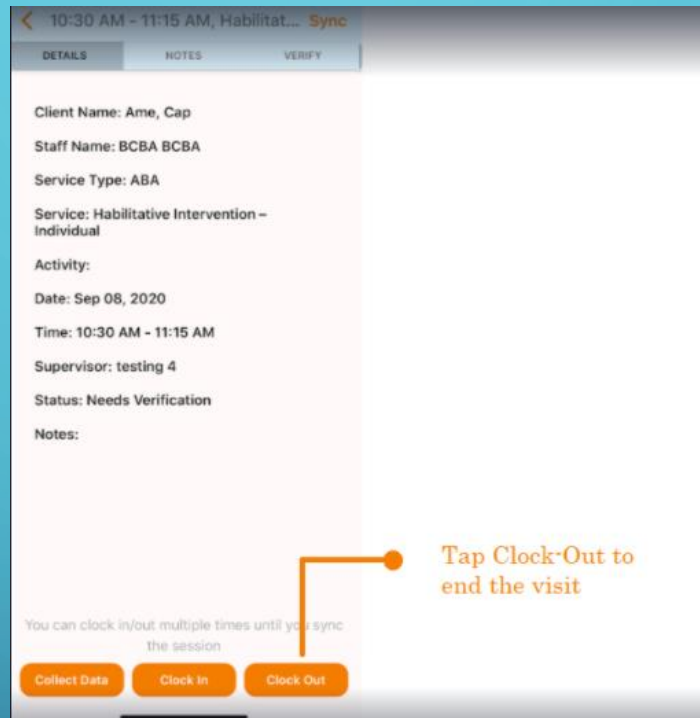

The screenshot shows the 'VERIFY' tab of an appointment interface. At the top, the title is '10:00 AM - 11:00 AM, 1:1 ABA Services - B' with a 'Sync' button on the right. Below the title are three tabs: 'DETAILS', 'NOTES', and 'VERIFY'. The 'VERIFY' tab is active. Under the 'Staff' header, there are two time selection sections. The first is 'Actual Appointment Start Time: 10:00 AM', with a dropdown menu showing options: 8:58, 9:59, 10:00 AM (selected), 11:01 PM, and 12:02. The second is 'Actual Appointment End Time: 11:00 AM', with a dropdown menu showing options: 9:58, 10:59, 11:00 AM (selected), 12:01 PM, and 1:02. Below these sections is a large orange 'Verify' button. Under the 'Parent' header, there are two dropdown menus: 'Name: Sample Parent' and 'Relationship: Parent', both with 'Choose' buttons to the right. Below these is a large white box with the text 'Tap to add signature'. At the bottom, another orange 'Verify' button is partially visible.

EVV AND CLOCKING OUT

Tap **Clock-Out** to register your end time for the service(s) rendered.

Please note that if you sync session without **Clocking-Out** then the system will auto-clock you out.

The Staff Member can only **Clock In/ Clock out** on Rethink's mobile app. Staff Members will not be able to manually add verification times through the mobile or desktop website.

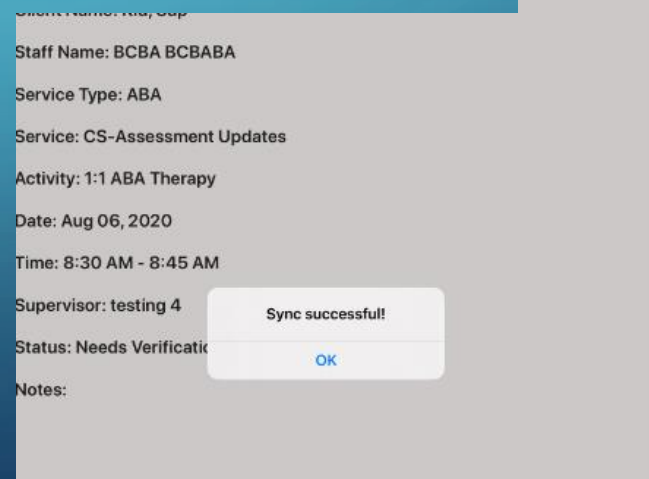

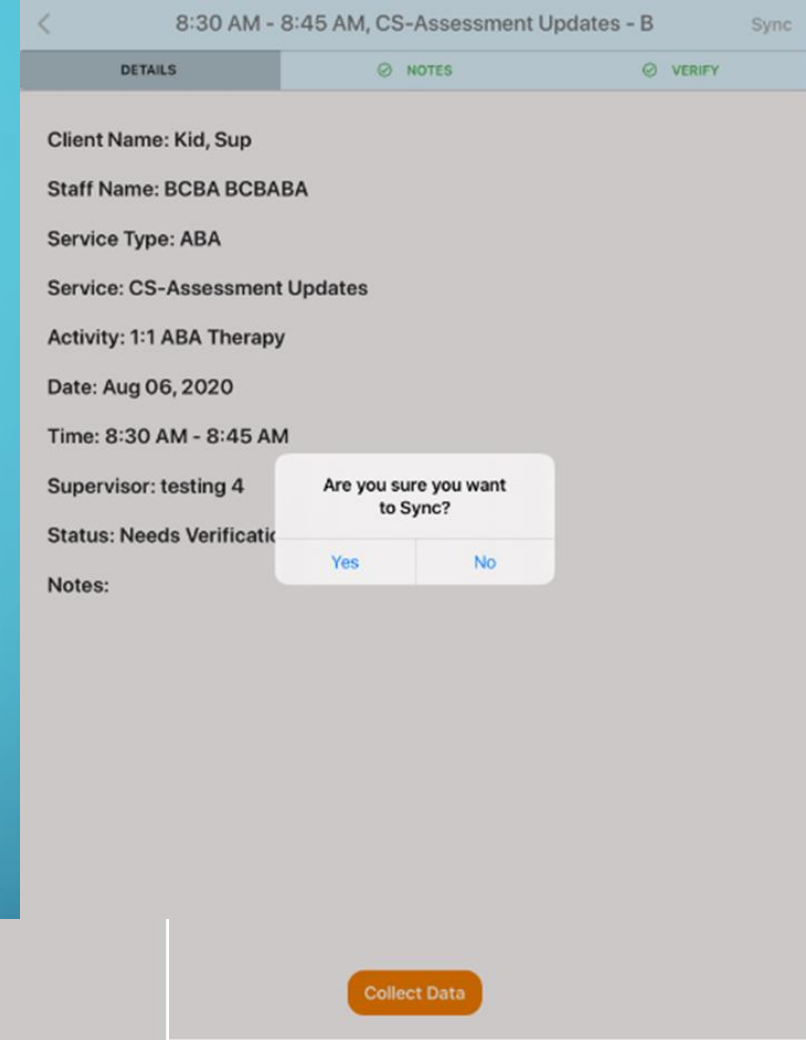

Ending and Syncing Your Data Session

When you are finished recording data, completed your session note, and verified your session, tap on the SYNC button in the top right-hand corner. The button ends your session with the Rethink App.

You will receive a message, asking “Are you sure you want to Sync? Press Yes, to continue with syncing your data and session note.

If you do not have internet connection, tapping on SYNC will save ALL data on your device.

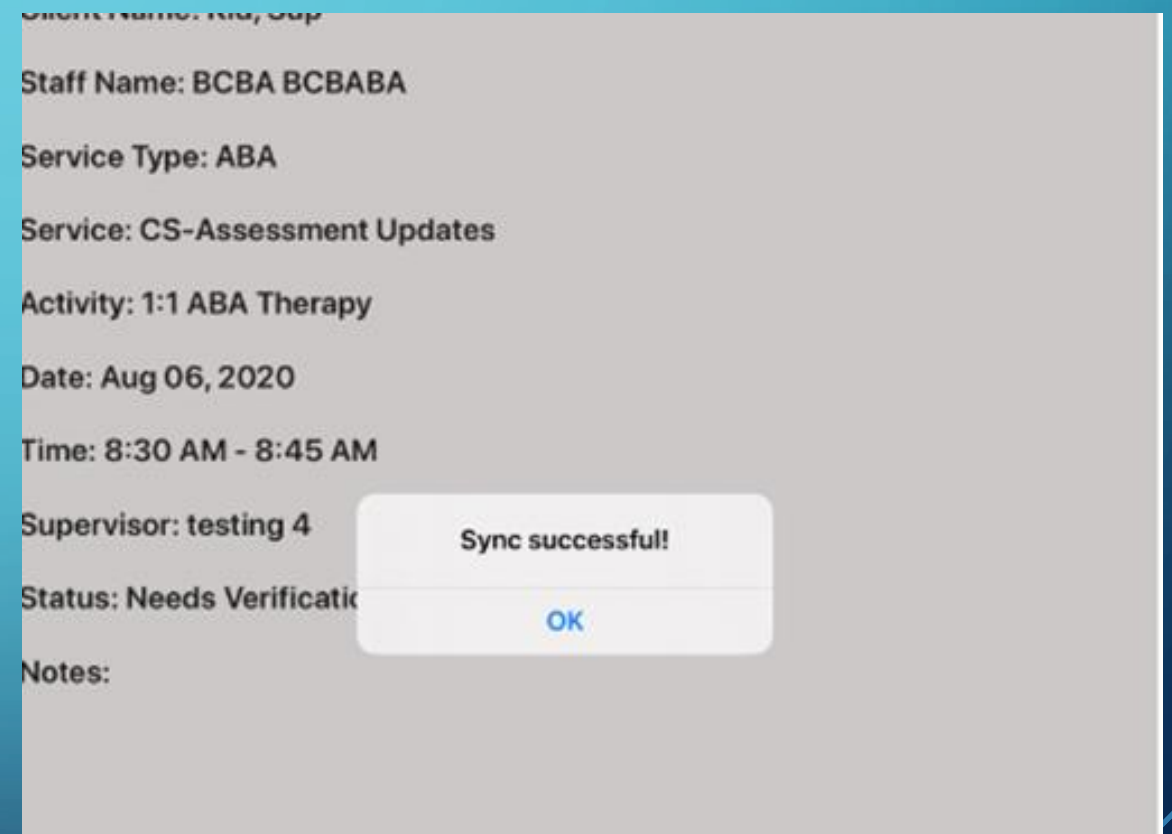

The next time you log into the app with internet connection, the data will automatically sync to the client’s program, file cabinet, and scheduler in rethinkbh.com, where you can view the data details and graphs.

Sync Confirmation

After you press Sync and Yes to confirm you want to sync ALL data, you will receive confirmation that ALL data synced.

The message will state “Sync Successful!” Press OK to continue.

The screenshot displays a mobile application interface with a grey background. On the right side, a white dialog box is overlaid, containing the text "Sync successful!" and a blue "OK" button. The background interface shows the following text:

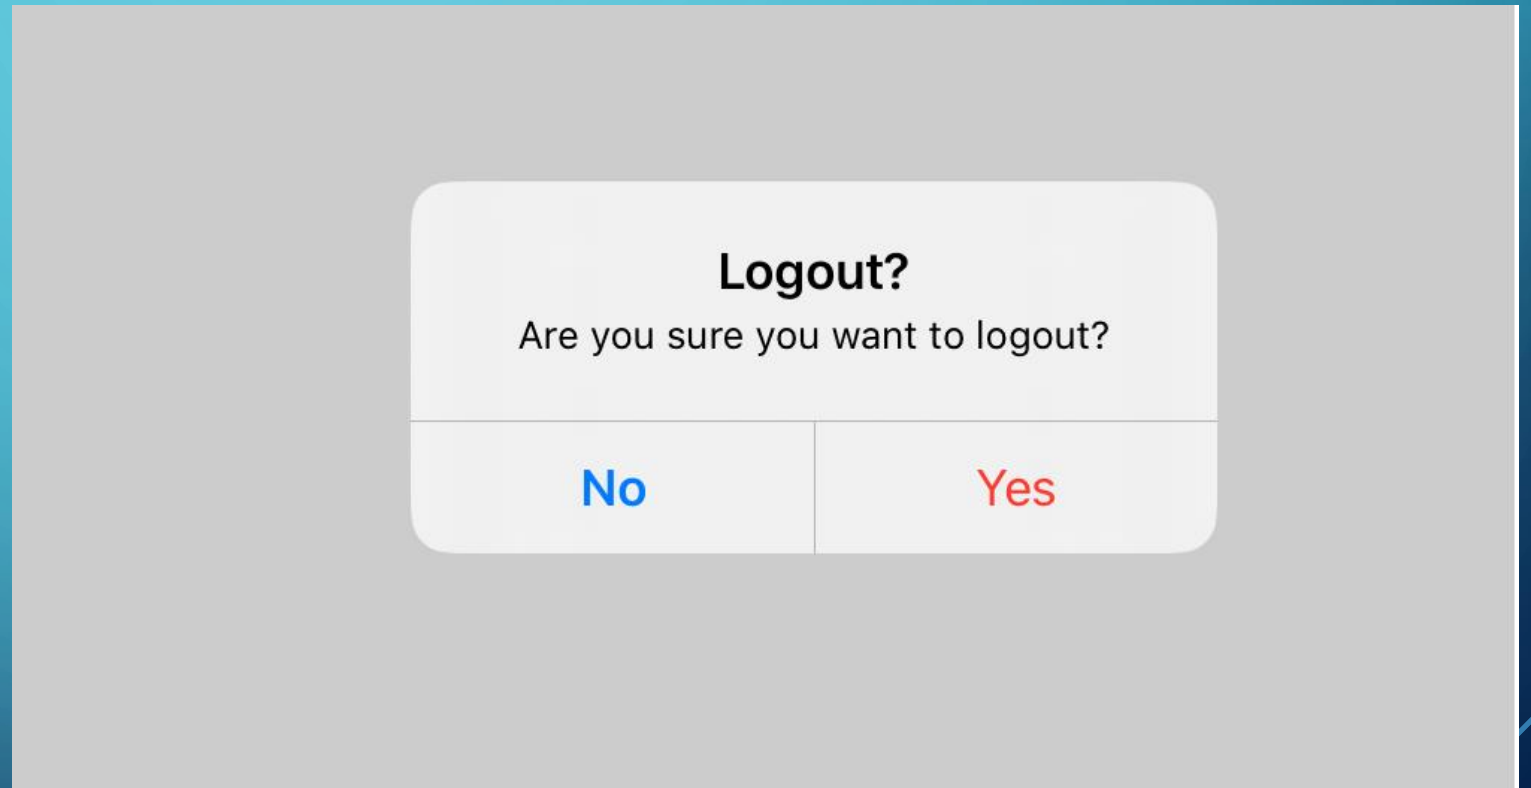

- Client Name: KID, Sup
- Staff Name: BCBA BCBABA
- Service Type: ABA
- Service: CS-Assessment Updates
- Activity: 1:1 ABA Therapy
- Date: Aug 06, 2020
- Time: 8:30 AM - 8:45 AM
- Supervisor: testing 4
- Status: Needs Verificatio
- Notes:

Ending Your Session and Logging Out

Logging Out:

After pressing sync and receiving confirmation

1. Press the back arrow to log out
2. You will then receive a LOG OUT confirmation. Press YES to log out.

ANDROID AND IOS

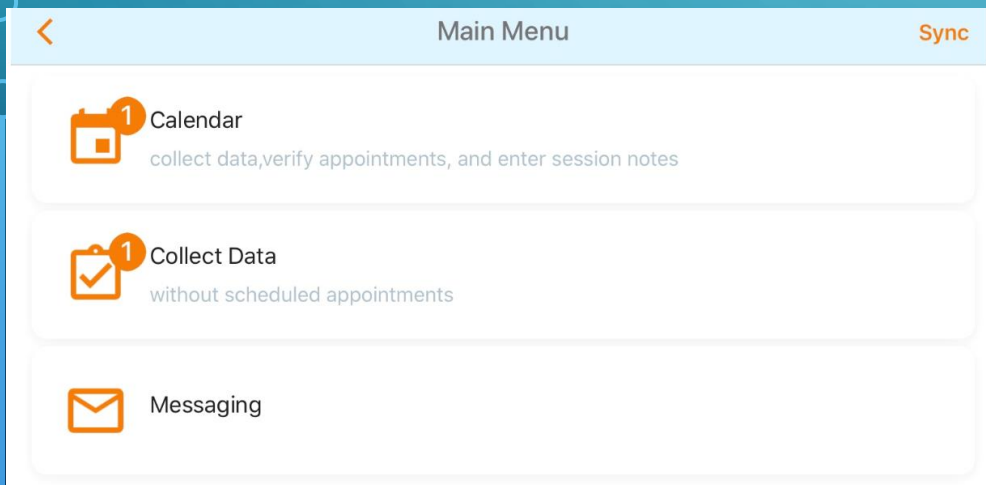

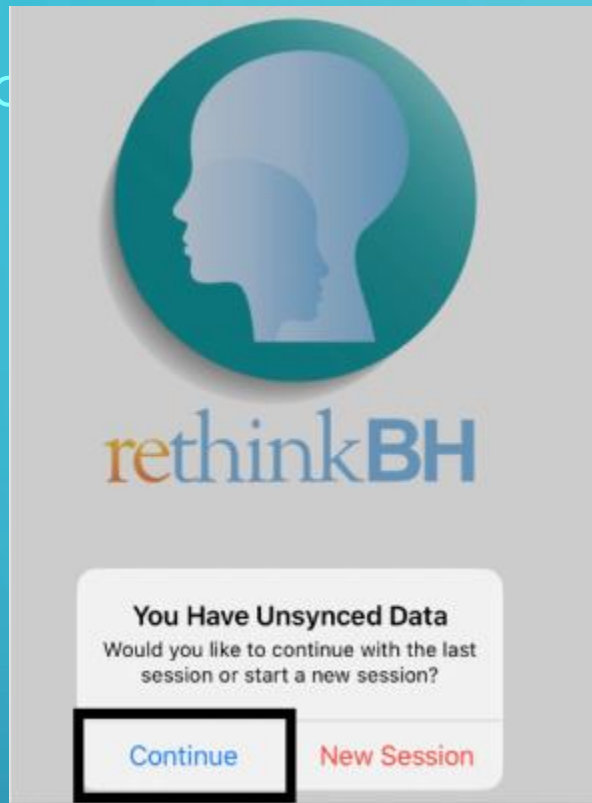

CONTINUING A SESSION & STARTING A NEW SESSION

Users can logout from the app with the option of continuing their data collection session later.

When logging back in with data stored on the device, the users are prompted to choose whether they want to continue a previous session or to start a new session.

When continuing a previous session, the app will take the user directly to the main menu page with the last client and appointment that was selected. Users can continue with data collection, ADD MORE PROGRAMS, and finish session notes.

When starting a new session, the app will sync your previous session's data on the device and then you can begin your new session.

Thanks!
